The threat environment in Iraq consists of four interacting conflicts: counter-occupation, terrorism, insurgency and a communal struggle for power and survival, occurring in the context of failing state and complicated by the external influences of Western, Turkish, Persian, and Arab civilizations.

Solving just one of these problems in isolation tends to make the others worse, so our solution set should be as complex as our problem set.

Counter-occupation is an implicit cultural norm that calls for Muslim populations to oppose non-Muslim forces on Muslim soil. This predisposes the Iraqi populace to at least passively support attacks against Coalition Forces and contributes to Iraqi youth vulnerability to recruitment by more violent elements.

Terrorism in Iraq is connected to Al Qaeda's global jihad that aims to create a virtual caliphate which is facilitated by regional terrorist and foreign fighter networks. The primary terrorist organizations in Iraq are the Sunni Extremist groups of Al Qaeda in Iraq (AQI) and to a lesser extent, Ansar Al Sunnah (AAS). Sunni Extremist brutal and excessive tactics such as the use of suicide bombers, indiscriminate attacks on civilians, and targeting fellow Muslims have eroded its popular support base. Sunni Extremist terrorism overlaps with the Sunni Rejectionist insurgency. Their intermediate objectives of weakening the Shia-dominated government coincide. However, the Sunni Extremist objective of creating a failed state to serve as a terrorist sanctuary from which to launch a global jihad is mutually exclusive with the Sunni Rejectionist objective of re-establishing a Sunni-dominated Government of Iraq that is eventually at peace with its neighbors.

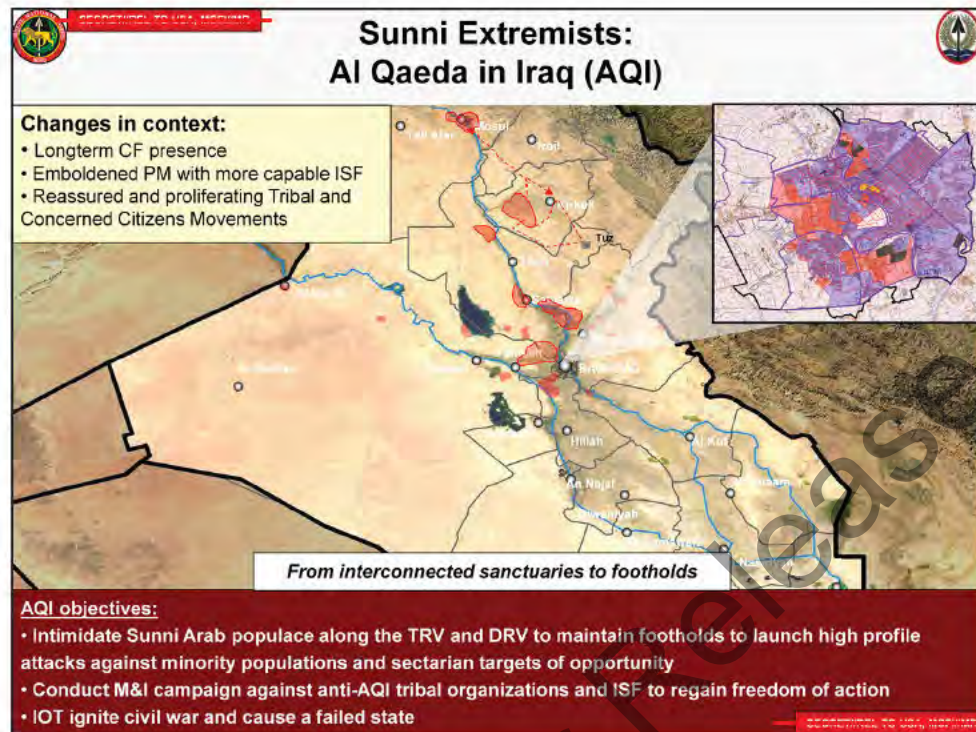

The insurgency in Iraq is an almost exclusively Sunni Rejectionist movement aimed at regaining former power and influence. The principal Sunni Rejectionist groups are the 1920s Revolutionary Brigades, the Islamic Army of Iraq, Jaysh al Mujahidin, and the more nationalistic elements of Ansar al Sunnah. The Sunni Rejectionist goal at restoring Sunni power is just one part of the ongoing communal struggle for power and survival.

The communal struggle for power and survival is occurring both between and among the various ethno-sectarian groups. The major Shia groups of SCIRI, Badr, OMS and Fadilah are working together to prevent the Sunni resurgence, but fight among themselves for Shia dominance. The primary Kurdish groups: the KDP and PUK are working to increase Kurd autonomy and extend the limits of Kurdistan where possible. The potential expansion of Kurdistan is opposed by both Sunni and Shia Arabs, as well as by minorities such as the Turkomen. Sunni tribes are banding together to fight AQI, but may pose a challenge to Sunni provincial and national politicians as the tribal influence grows.

The Gol's capacity to respond to the interacting conflicts is hindered by its current condition as a failing state. The Gol is struggling to develop the governmental, ministerial and security capacity to deal with the threats that confront it. The external influences of Western, Turkish, Persian and Arab civilizations increase the complexity of Gol's situation and reduce the likelihood of solutions agreeable to all actors.

Approved for Release

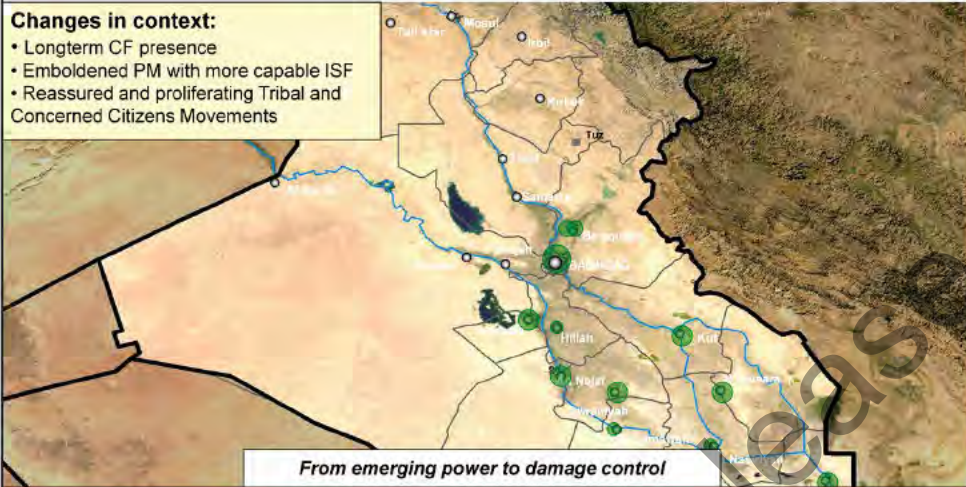

## The Sadrists and Jaysh al Mahdi (JAM)

**Changes in context:**

- Longterm CF presence
- Emboldened PM with more capable ISF
- Reassured and proliferating Tribal and Concerned Citizens Movements

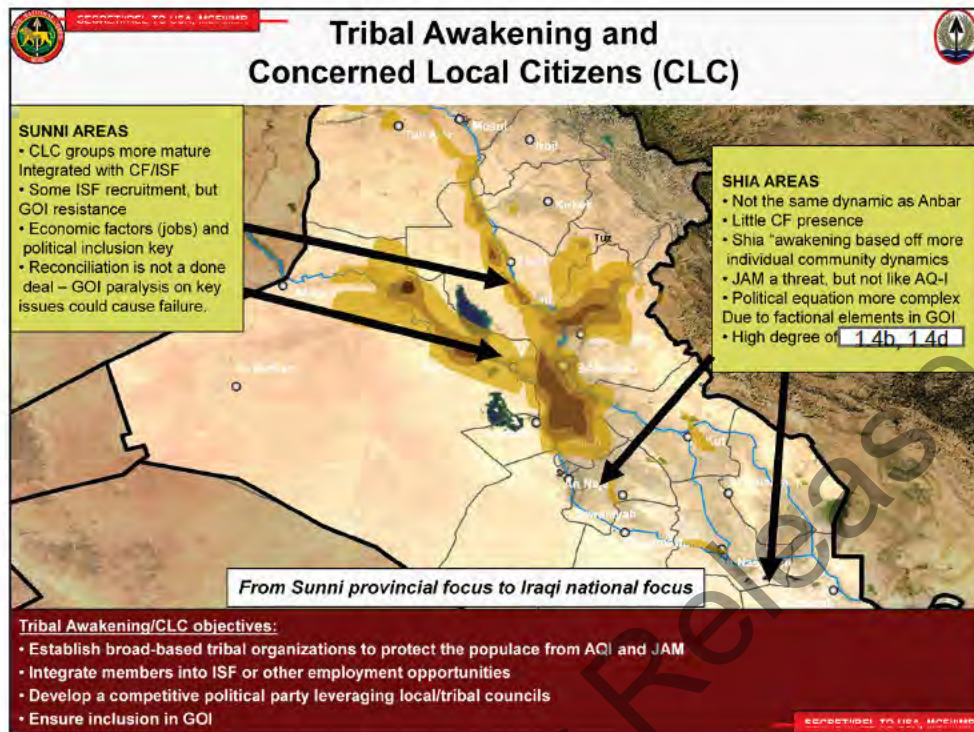

*From emerging power to damage control*

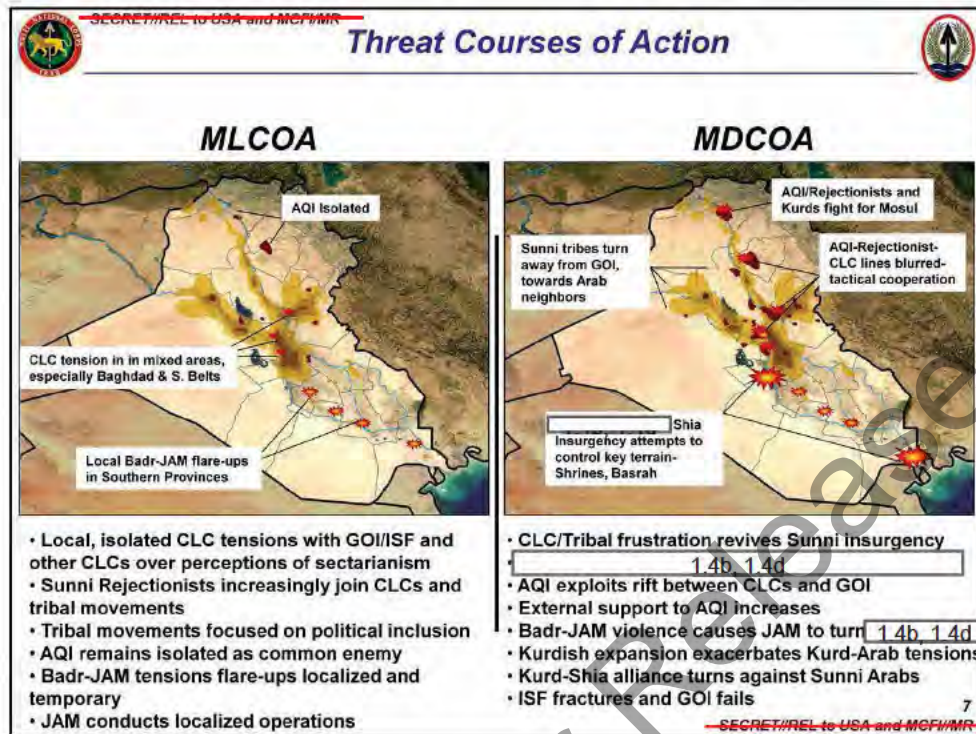

**Sadrist/JAM objectives:**

- Stand-down and reorganize JAM to reverse the decline in popular support
- Conduct political maneuvers to reverse decline in influence and counter Party of Four
- 1.4b, 1.4d
- Adjust counter-Occupation stance

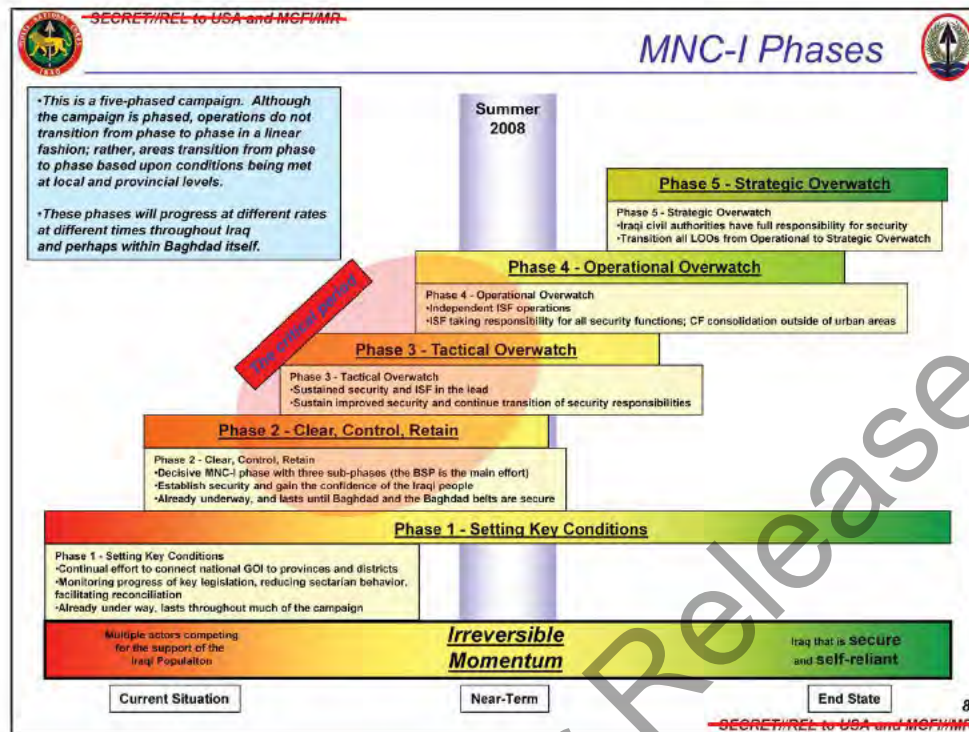

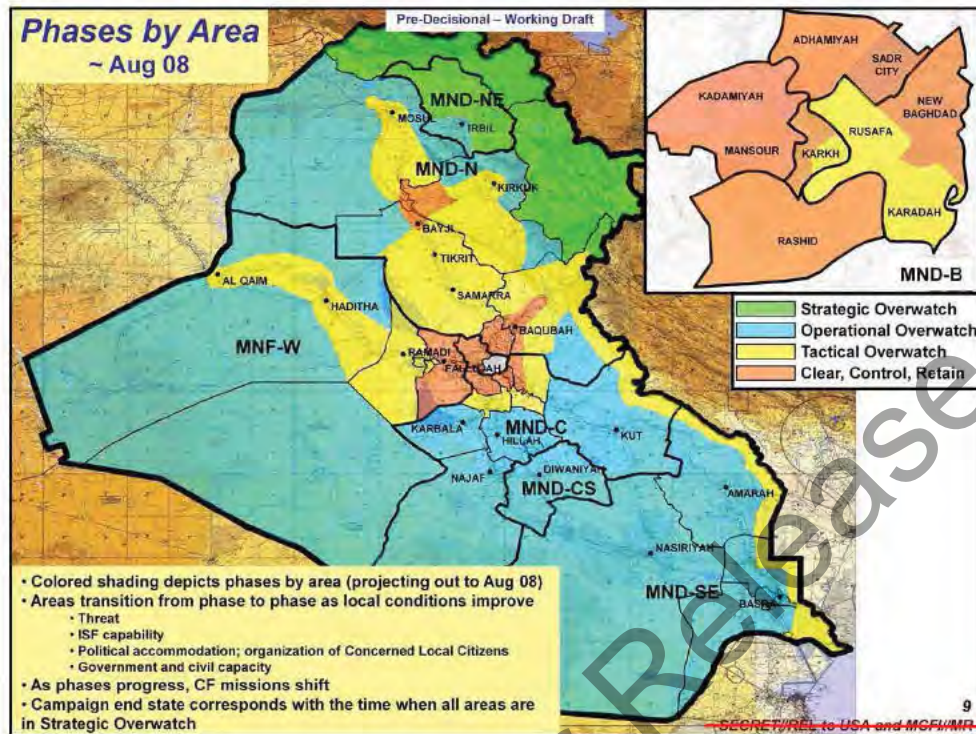

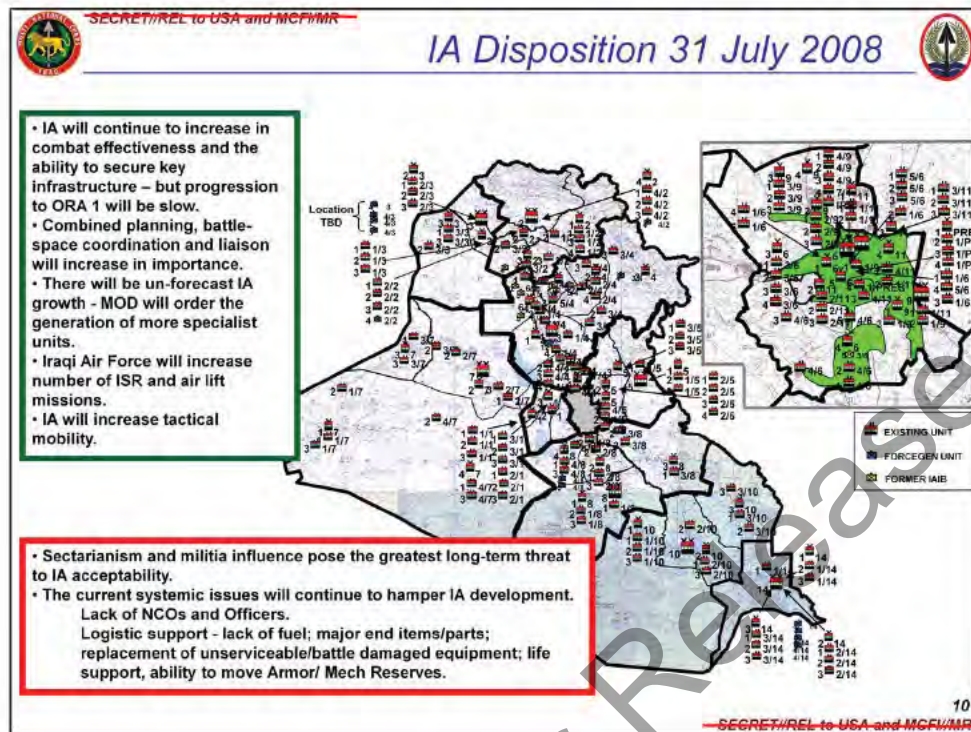

- Phasing construct acknowledges diverse conditions throughout the country
- Different parts in different phases
- Phases reflect the relationship between the security environment, ISF capability, and Coalition Force posture in a given area
- The general progression goes from high CF involvement in providing security in earlier phases, decreasing over time
- In Phase 2 – establishing security through a deliberate clear-control-retain approach in partnership with the Iraqis
- In Phase 3 – efforts to protect the population and neutralize threats to security continue – but under ISF lead; gradual shift in CF posture initiated at the end of Phase 2 continues; this re-posturing involves a “thinning of the line” that allows routine CF interaction with the population to diminish as the ISF assumes more responsibility for COIN operations
- In Phase 4 – ISF independent operations – with growing IP lead in population centers; further reduction in CF interaction with the populace and a noticeable decline in CF presence as forces consolidate on major FOBs
- In Phase 5 – All elements of the ISF performing their functions; full responsibility lies with the Iraqi civil authorities

This slide shows the forecast disposition of the IA on 31 Jul 08. By then the IA will comprise 12 Divisions, 47 Brigades and 153 Battalions at FOC or better. The 1st Presidential Brigade will have been generated and plans for the integration of 2 Peshmerga Divisions will have become a reality. This total includes 9 of the former SIBs that will have completed training and will have transitioned to the IA as IAIB, leaving 8 to train and transition. Finally, the new EOD Regiment and the Infrastructure Repair Battalion will be in place.

Further equipment will have been fielded: Badger fielding will be complete by end 07, 110 BMP 1 will have been purchased to equip 3 IA BNs (probably in 5, 6 and 11 Divisions) and 251 ECM sets will be issued in early 08. M16/M4 fielding to 3, 6, 8, 9 DIV and 3/1 BDE will be complete and fielding of 60mm mortar could be achieved. Finally MRAP delivery may make HWMMV/UAH available for the IA and ~320 x 120mm mortars could be available.

This equipment delivery is not without implications – greater tactical mobility will result in greater demand for fuel; additional BMP battalions may result in a demand for operational mobility that is beyond the IA and 120mm mortars bring obvious requirements for FDC, tactical communications, interoperability and air-space control.

The ML and MDCOA briefed earlier highlighted the implications of sectarianism and militia influence and these will remain the greatest threat to IA acceptability.

Finally, the identified systemic issues (the lack of NCOs and officers and logistic support) will continue to hamper IA development and effectiveness.

#### UNITS NOT AT FOC AUG 08

Unit	FOC	Future Location
4/2/2 IA	TBD	Mosul?
4/3 IA	TBD	Ninewah
4/3/2 IA	TBD	TBD (IAIB)
4/4/2 IA	TBD	Mosul?
4/3/4 IA	TBD	Sulayminiyah
12 IA	TBD	Tikrit
1/5/4 IA	TBD	Al Hijil (IAIB)
4/5/4 IA	TBD	Al Bakara (IAIB)
5/5/4 IA	TBD	Al Ryath (IAIB)
2/6/4 IA	TBD	Al Hathir (IAIB)
3/6/4 IA	TBD	Al Asmida (IAIB)
5/6/4 IA	TBD	Al Synia (IAIB)
5/3/6 IA	TBD	Mahmudiyah (IAIB)
4/14 IA	TBD	Basrah

**IP Status 31 July 2008**

Province	Mol Authorized	Mol Assigned	Proposed Authorized Increase	PDOP Request Sent	Mol Pending Approval	Hiring Orders Issued	Projected Total
Al Anbar	21,000	16,460	6,000			-	27,000
Babil	11,836	9,121	-			-	11,836

<b>Total</b>	<b>246,848</b>	<b>238,681</b>	<b>43,067</b>			<b>8,779</b>	<b>290,232</b>

★ Baghdad IP expansion is projected to be complete by May 08.  
 ★ Will not meet projected Iraq wide totals by 31 July 2008 but will make progress towards the Mol 5-year endstate.

- Reconciliation efforts will result in a steady increase in IP numbers and greater Shia/Sunni policing of their own areas.
- Baghdad IP Expansion will be followed by a similar process elsewhere.
- IP capability to conduct effective independent operations will continue to increase.
- Local security, particularly in PIC Provinces will be increasingly led by the IP but the IA and NP will remain in the lead where COIN operations are being conducted.

- Sectarianism and militia influence pose the greatest long-term threat to ISF acceptability.
- The lack of officers will continue to inhibit IP development and effectiveness.
- IP unlikely to have achieved effective administration:
  - Database for Criminal Records
  - Standardized reporting procedures
  - Institutional investigative standard

11

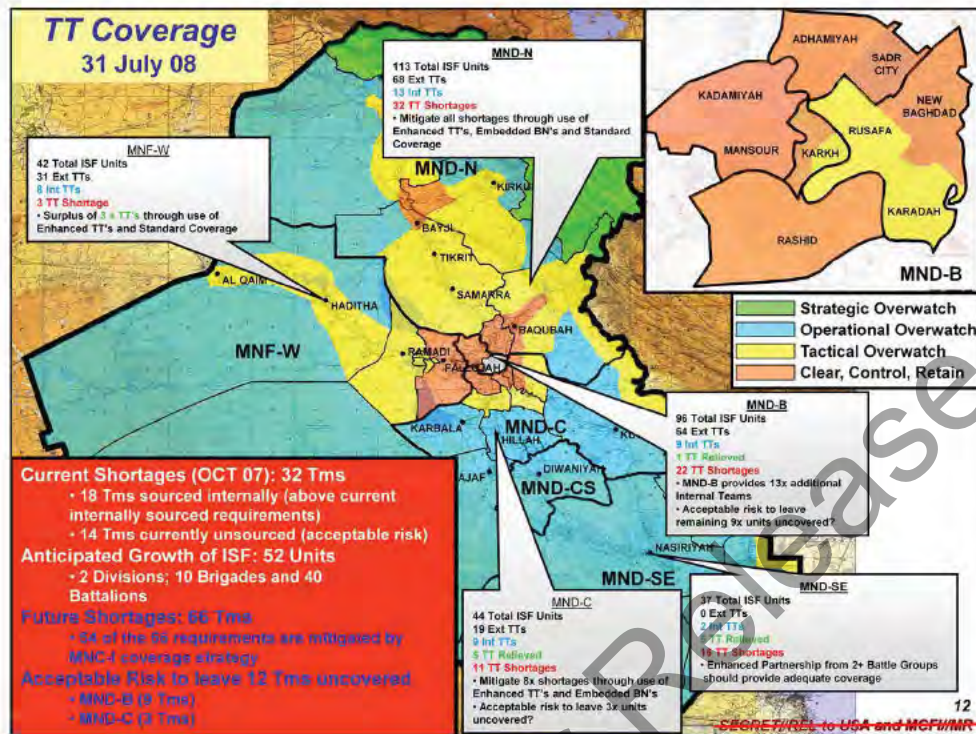

~~SECRET//REL to USA and MCF/MPR~~

This slide shows the ORA status of the IP now and a forecast for 31 Jul 08 for the Provinces and for the major cities. The IP currently comprises an authorised strength of 239,209 with 238,681 assigned. Based on current proposals this will increase to at least 286,232 by next July.

Reconciliation will contribute both to an increase in IP and more representational policing, dependent on MOI clearing the names of potential recruits and issuing hiring orders. By 31 Jul 08 the Baghdad IP expansion will have seen the use of expedient police stations and the first of the new stations will be complete.

This expansion is not without risk; financial, training, logistic and sectarian but if successful could be followed by a similar process elsewhere. The scale of effort required for such activity demands that future expansion of this type be prioritised to deliver greatest effect in relation to CF posture and presence.

Sectarianism and militia influence pose the greatest long-term threat to ISF acceptability and the lack of officers will continue to inhibit IP development and effectiveness.

Sir, this slide lays out projected shortages with a plan to mitigate shortages in each MND.

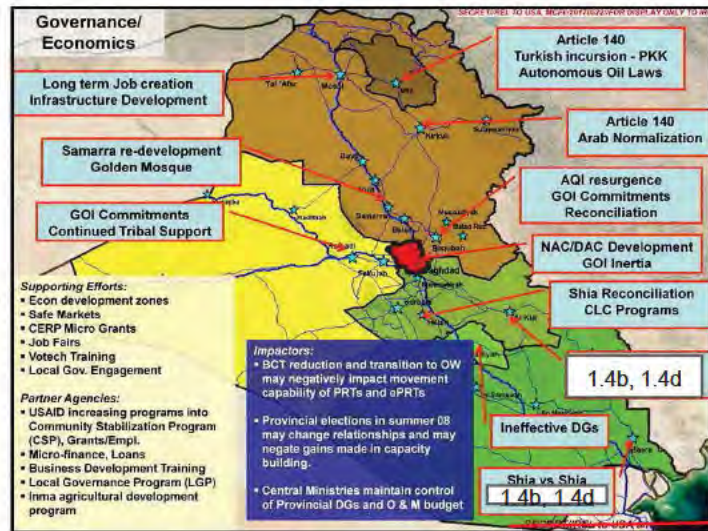

MNF-W and MND-N can mitigate all shortfalls through a combination of enhanced TTs, standard coverage in the higher risk areas and embedded BNs with newer or less experienced units. MND-SE will use an enhanced partnership with two plus battle groups to provide adequate coverage to the IA units in MND-SE.

MND-C will have three remaining shortages which could accept risk and remain uncovered. The units are 1/4/8, Unity and Sarafiyah BNs.

MND-B will have 9 units uncovered. The Pres BDE and 3 BNs, the 11<sup>th</sup> MTR, Justice BN and three Log BNs.

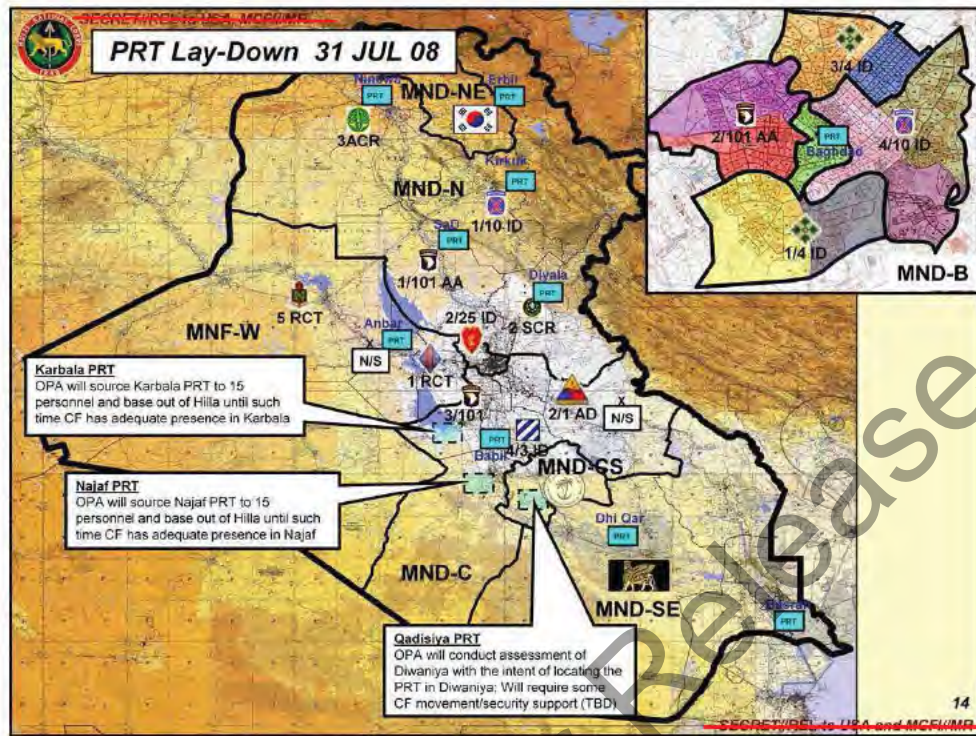

Overall we believe we can provide adequate coverage to the ISF with a mixture of the different models and acceptance of some risk.

18 SEP 07

~~SECRET//REL to USA and MCF/MP~~

Operational Risk:

1. Failure of the GOI to capitalize on the security gains/ breathing space given it by the Surge and Fardh al Qanoon.
2. CLC's begin isolating themselves from the GOI/ CF and choose not to legitimize through the political process.
3. Intra-sectarian Violence increasing: Especially in the South over resources, the Port system, etc This may represent a threat to our ground LOCs.
4. Inter-sectarian Violence increasing: ~~Sunni on Shi'a~~ violence increasing throughout key locations/ regions in the ~~Ab 14d~~
5. Rate of ISF force generation too slow to control and retain cleared areas as CFs depart.
6. ISF force generation exceeding resources available to develop and sustain them.
7. Failure to approve appropriate long-term security agreements.

Not mutually exclusive

## Sunni Rejectionists: Iraqi Hamas/1920RB/JAI/JM

**Changes in context:**

- Longterm CF presence
- Emboldened PM with more capable ISF
- Reassured and proliferating Tribal and Concerned Citizens Movements

*From insurgency to inclusion*

**Rejectionist objectives:**

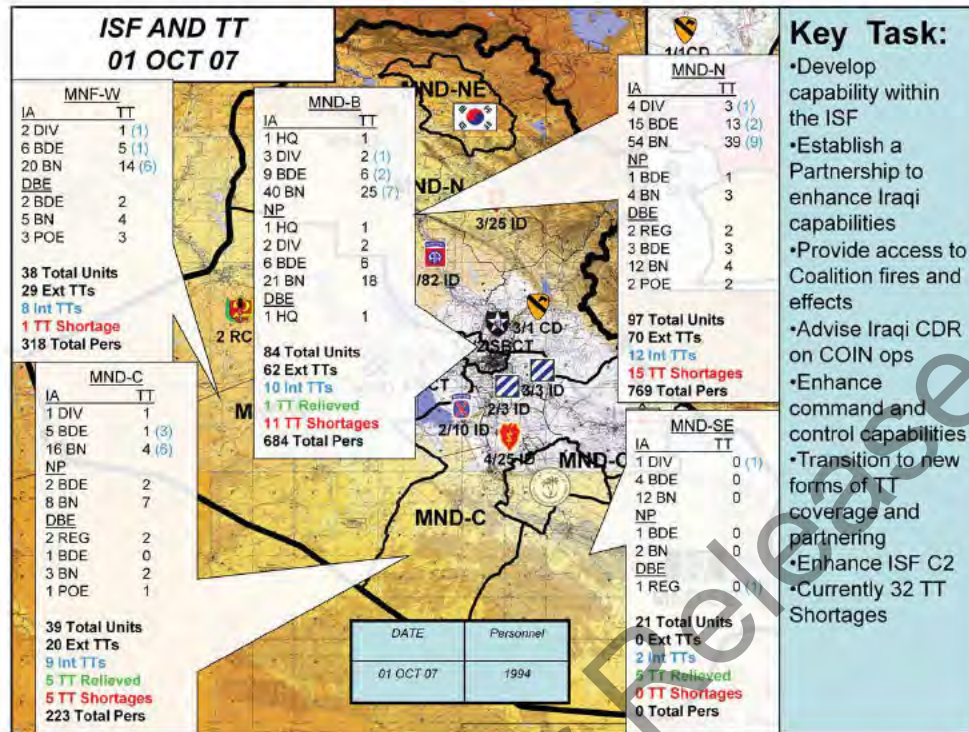

- Recruit members disillusion with extremist groups into rejectionist groups
- Merge disparate armed factions that are torn between targeting CF or AQI
- Organize united negotiating position
- Exploit former AQI members for intelligence and isolate NBP

Sir, this slide is designed to represent a Theater Posturing Conference. The different plateaus represented by this concept are representative of the MNC-I Campaign Plan. Of note, we have made it clear to MNF-I in our joint planning efforts that this is a flexible and conditions-based concept. As such each of the steps we will go through tonight attempt to clearly lay out the security and ISF capabilities necessary to move us from one plateau to the next. We recognize there are decision points associated with each plateau, the decision to go from one step to the next is dependent on the conditions we will lay out being met. Finally, let me highlight that the conditions we used are taken directly from the MNC-I campaign plan or OPORD 07-01.

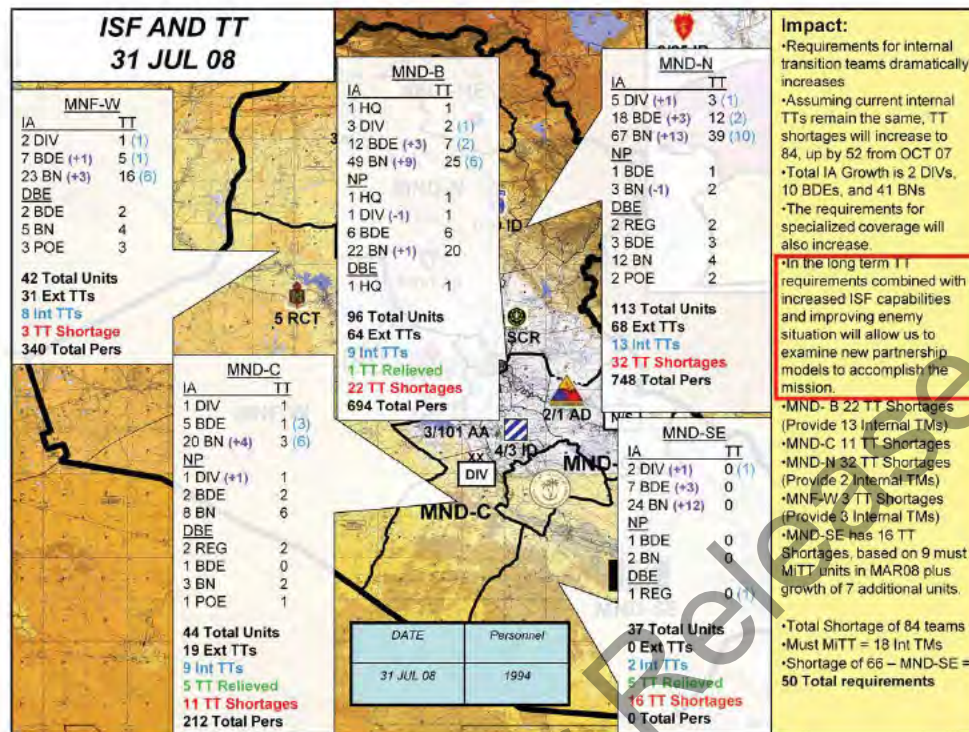

Sir, the slide on the left shows the current ISF laydown and the current TT shortages which you were briefed on yesterday.

In the TT column the numbers in blue are the internal Transition teams

And the number in red at the bottom of each call out box shows the current TT shortages

Sir, the slide on the left shows the projected numbers for the ISF and the TT shortages as of 31 JUL 08.

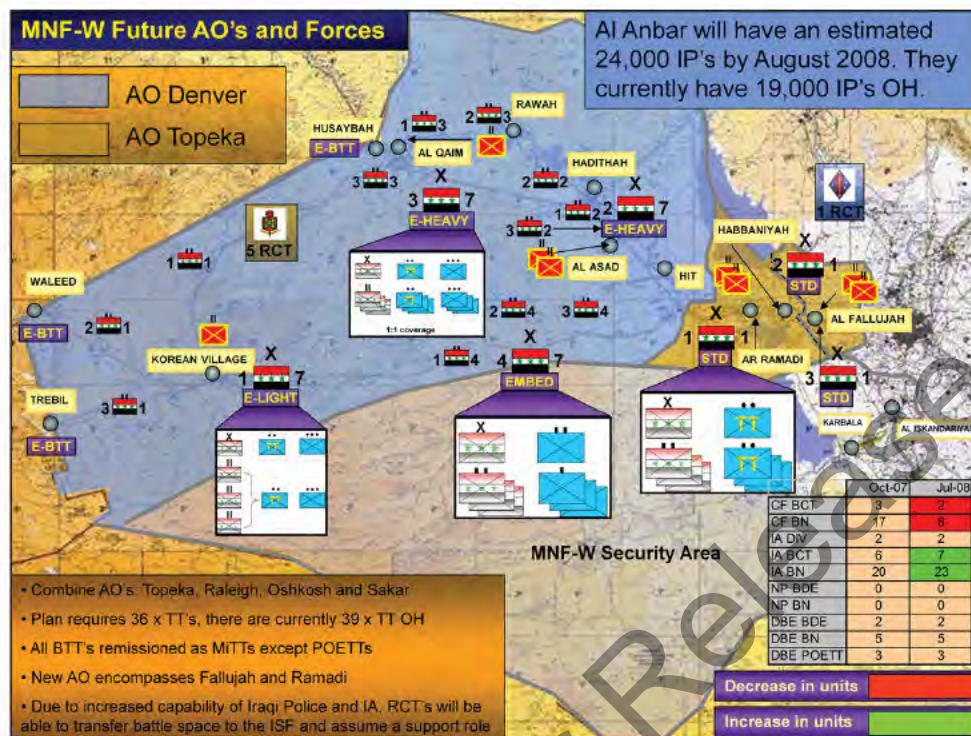

The number in purple shows the growth of the ISF during this time.

MND-N, MND-SE and MND-B have the largest amount of growth over this time.

We project that we will be short approximately 128 Transition teams at this point

Sir the bottom line of this slide is the box highlighted in red in the impacts box.

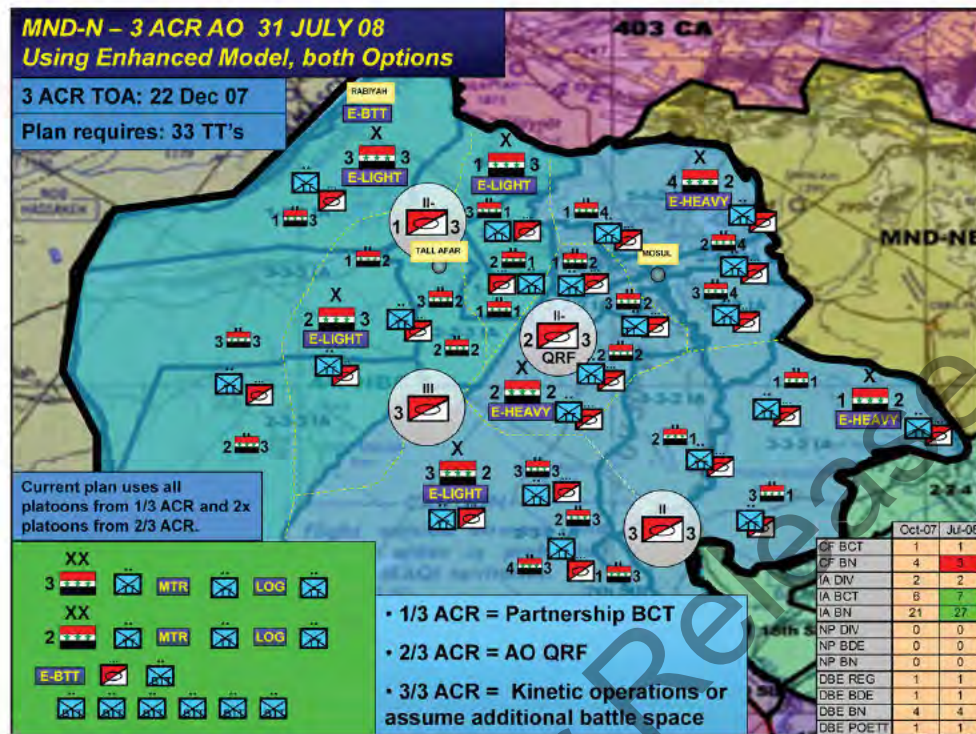

Sir, the next two slides lay out a couple of examples of how these models can be applied to battlespace.

In MNF-W out along the western border we use an Enhanced LT model where the threat is lower and as we move towards Fullujah and the threat increases the models change.

Around the Haditha area we move to an Enhanced Heavy model.

4/7 IA will be a brand new unit so we used an embad model in an attempt to put more emphasis on rapidly building this unit and finally near Fallujah we use a standard model.

Sir, next we move to MND-N in the Ninewa province.

In MND-N we used a combination of Enhanced Heavy and Enhanced Light to cover the IA units. To cover all the borders and IA units would require

1/3 ACR is dedicated to ISF/TT oversight and 2/3 ACR is centrally located to act as a QRF.

3/3 ACR is free to conduct kinetic operations or could assume additional battlespace
