MARNE FORTITUDE II MISSION STATEMENT

Declassified by: MG Michael Y. Garrett,
USCENTCOM Chief of Staff
Declassified on: 201505

MND-C CONDUCTS FULL-SPECTRUM OPERATIONS NLT 01 JAN 08 TO INTERDICT ACCELERANTS INTO BAGHDAD, DEFEAT SECTARIAN VIOLENCE, SECURE THE POPULATION AND INCREASE THE CAPACITY OF IRAQI SECURITY FORCES, PROVINCIAL GOVERNMENTS AND ECONOMIC SYSTEMS IN ORDER TO CREATE THE CONDITIONS FOR LONG-TERM IRAQI SELF-RELIANCE. ON ORDER, MND-C TRANSITIONS SECURITY OPERATIONS TO IRAQI SECURITY FORCES.

KEY TASKS:

- Make safety and security the first priority without being risk averse
- Continue operations to find MND-C's MISCAP Soldiers and kill or capture those responsible for the attack against our MISCAP Soldiers
- Continue conducting offensive operations to kill or capture irreconcilable extremists and criminals
- Develop options for the employment of CLCs that will not join ISF
- Partner with ISF across the AOR in order to facilitate transition and set conditions for sustainable Iraqi control of the Security line of operation (LOO)
- Defeat extremists conducting sectarian violence through lethal and non-lethal means
- Interdict accelerants to Baghdad's sectarian violence in order to sustain the improved security situation
- Neutralize VBIED, EFP, IDF and sniper networks through lethal and non-lethal means
- Disrupt sanctuary areas in south and east Baghdad and in north Babil in order to prevent the staging of accelerants

3HBCT TOA DATE: 4 APR 07	
<ol style="list-style-type: none">1. Captured 29 HVI's2. Grew ISF from 3700 to 44003. Established CLC Program (5741 CLCs)4. \$15 million in CERP projects completed5. Mentored Mada'in Qada Government6. Court returns to Mada'in Qada – Judges now issuing warrants and IPs executing warrants7. Established the "Voice of the Mada'in" radio station	
BLUF: 3HBCT, 3ID maintains pressure on the enemy across all Lines of Operation: Security, Transition, Reconciliation, Economics, Governance, Rule of Law, and Communication	

Approved for Release

3HBCT, 3ID MISSION AND INTENT	
v. 06 1600 JAN 08	
MISSION: 3 HBCT conducts Full Spectrum Operations (FSO) ICW Iraqi Security Forces (ISF) and CLCs, to interdict accelerants IOT deny extremist elements freedom of movement from the Mada'in Qada into Baghdad and prevent sectarian violence.	Purpose: Prevent violence and allow the local populace to live in a more secure environment. Decisive Point: We must, along all lines of operation, keep pressure on the insurgent which removes the conditions that cause the local populace to give sanctuary to the accelerants and their facilitators. Key Tasks: <ol style="list-style-type: none"> 1. Security: Interdict accelerants entering Baghdad; continue offensive operations to kill or capture extremists; neutralize IED, IDF, and sniper networks; defeat sectarian violence through lethal and nonlethal means to sustain the improved security situation. (MND-C 2.3.6,7,8,9) 2. Protect the force: Make safety and security your first priority without being risk adverse; improve your positions daily, execute operations in a safe manner, and mitigate assessed risks. Maintain the warrior ethos, never allow yourself or a battle buddy to be taken prisoner. (MND-C 1) 3. Transition: Partner with, and assist, the ISF to enforce the rule of law and develop capabilities; develop CLCs south of Salman Pak to thicken the lines of security. (MDN-C 5,10,11,12) 4. Governance: Create conditions for Iraqi self-reliance within the Qada by further developing functioning, efficient local and Nahia councils who can provide essential services to the people. (MND-C 13,14,16) 5. Economics/Employment: Remove conditions conducive to the insurgency by developing self sustaining employment in agriculture, industry, and small business to create economic growth for the Nahias. (MND-C 4,14) 6. Rule of Law: Return the Qada Judge to Salman Pak to enforce the rule of law by investigating and prosecuting local criminals and provide legitimacy to the Qada government. (MND-C 16) 7. Communications: Inform, influence and assess the people in Mada'in Qada to not support the insurgents; integrate US and Iraqi media into operations to ensure that we reach the target audiences with the right message; conduct consequence management in everything we do. (MND-C 15) 8. Treat all people with dignity and respect throughout the operation.
	Endstate: 3 HBCT partnered with ISF and CLCs operate without overt sectarian bias; and Police are competent. Shia extremists, Sunni extremists and Iranian proxies are unable to move accelerants into BAGHDAD. Nahia institutions and ESS are functioning and secure as they gain support from the population within AO HAMMER. A stable and self-sustaining economy is established by the Qada and Nahia governments with increased employment and sustained growth. Iraqi population feels secure and has confidence that their Nahia governments represent the needs of the people IAW the Rule of Law; and 3 HBCT has set the conditions for a successful RIP/TOA to 2/1 BCT and for future transition of security to the ISF.
Partnering: CF and ISF together plan, train and execute COIN operations to protect the population. Each force conducts some independent operations where and when necessary. CF continues to provide enablers while ISF develop its own capability, particularly in the area of sustainment. (MND-C FRAGO 124)	

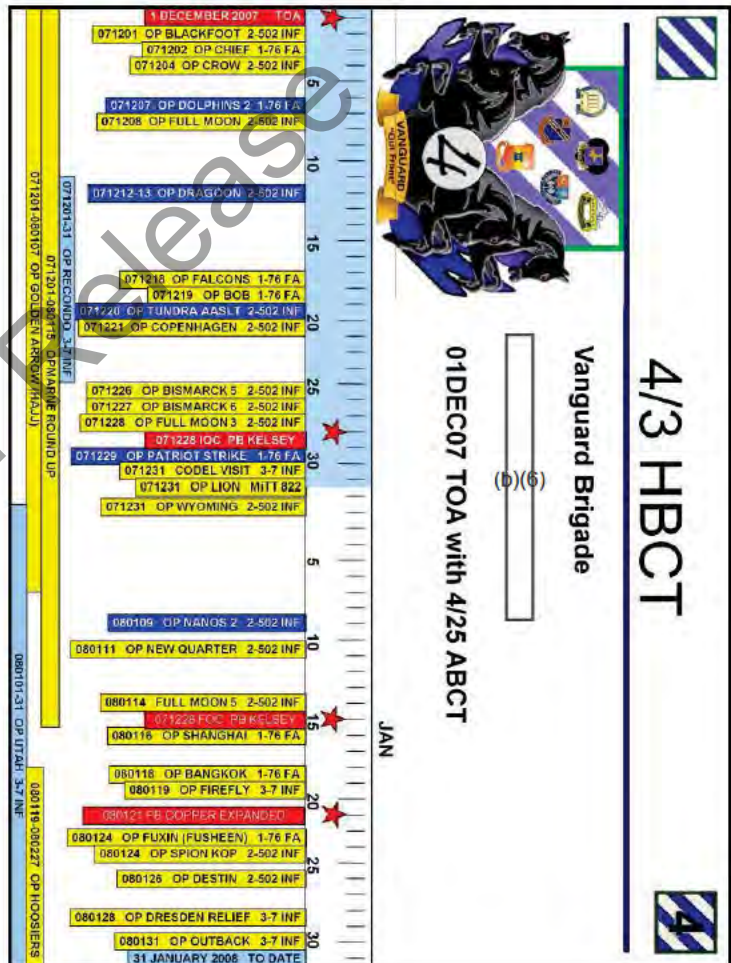

3HBCT, 3ID OPERATIONS SUMMARY	
LAST 14 DAYS: OPN SPARROW SUNRISE: 7 CLC CPs established along RTE Sparrow, 9 IEDs were found, 3 UXOs removed, 1 RPG attack causing no damage or injuries, and 7 EKIA. Mission Statement

3/101 BCT conducts full-spectrum operations to assist the GoI and ISF in stabilizing acceptable security levels (interdicting accelerants into Baghdad, defeating sectarian violence, and securing the population) in order to continue to increase the capacity of Iraqi security forces, and foster local governments and economic systems that set the conditions for long-term Iraqi self-reliance.

Key Tasks:

- Neutralize AQI, irreconcilable extremists and criminal networks that threaten security
- Interdict accelerants to Baghdad and prevent sectarian violence
- Disrupt extremists in the Jackson Corridor and Said Abdullah Corridor
- Partner with ISF to facilitate transition
- Transition ISF to tactical overwatch in order to put Iraqis in charge of their security.
- Monitor and control Concerned Local Citizens initiatives in order to thicken the security lines, and assist their integration with the ISF.
- Ensure ePRT and Government support teams are resourced with the right people, skill sets, and enablers to focus resources and expertise in the development of governmental and economic capacity.
- Foster "grass roots" governance movement that links local councils to the Nahiya Councils
- Operationalize information operations by integrating PAO and IO into all operations in order to ensure we reach the target audiences with the right messages.

Approved for Release

Last Confirmed IDF Attack on FOB Delta

27 AUG 07

Last IDF Attack in AO Kartli

27 DEC 07 (IDF on CP 5)

Last IED/EFP in AO Kartli

09 DEC 07 (IED on Bismarck)

17 -24 JAN 08

The primary threat in AO KARTLI continues to be IEDs, primarily on ASRs Bucharest, Kiev, Topeka and Bismarck. ASR Roswell is still suspected to have IED's emplaced between Numaniyah and Zubadiyah. ASR Roswell route status remains **RED**. The last IED attack occurred on ASR Bismarck, between CP 5 and Al Aziziyah, on 09 DEC 07 with 3 KIA and 1 WIA. ASR Bismarck route status remains **BLACK** north of the intersection with Route Fenway.

Shi'a extremist elements are still capable of conducting complex attacks with SAF, RPG's, and IED's. IDF continues to remain the most viable casualty-causing threat to FOB Delta. The last IDF attack against FOB Delta took place on 27 AUG 07. Numaniyah appears calm as IA and IP elements from Al Kut have been conducting patrols and CP's in and around the city. FOB Germany reported the discovery of two IEDs IVO FOB Germany. The IEDs was picked up by ISF and turned into the Numaniyah IP HQ.

1.4c reporting indicates an additional threat to CF on Delta is overt and covert collection efforts by LN's either being intimidated or coerced by Shi'a extremists or through active Shi'a extremists or 1.4b 1.4d entering the FOB for legitimate and non-legitimate day to day business. There was one report confirming this during this reporting period. Also there has been several reports about the Shia Extremist Cult, Jund Al Sama (Army of Heaven), planning to conduct attacks in AO Kartli, specifically the Wasit oil storage facilities.

The probability of attacks on the Marne Sentry CP's increases the longer they are in use by the 3 GA BDE. Due to the anticipated effectiveness of the new CP's throughout the province, FOB Delta and the CP's are expected to be targeted by Shi'a Extremists. Any LNs who are employed at the CP's or FOB Delta or do contract work for CF are expected to be targeted for assassinations or extra-judicial killings, unless they work for the Shi'a Extremist Groups.

Continued current and past reporting indicates that the risk of kidnap attempts against US/CF soldiers continues as a viable threat. Current reporting identifies FOB Delta as a primary location for such efforts, since its overall size and extensive perimeter could make it appear a softer target than other CF installations.

Finally, as the Ashura- Arabeen holiday period approaches AO KARTLI can expect an influx of Shia pilgrims transiting to Karbala and Baghdad for observances and celebrations. As of the date of this assessment there has been at least five (5) threat reports of attacks against pilgrims but none of those are planned for AO KARTLI. However, the possibility of targets of opportunity presenting themselves thereby increasing sectarian violence remains very viable in and while transiting AO KARTLI. US and CFs have requested increased ISR coverage for situational awareness (SA) during this period. Increased coordination with ISF has also been initiated to limit and/or prevent any violent incidents inside AO KARTLI.
