

“Posturing for the Long War” Potential Courses of Action for the Drawdown of US Forces

COAs Based Off MNF-I Commander Guidance

SECRET//REL to USA, AUS, CAN and GBR//ORCON//20151214

MNC-I C3 Force Gen, 18 December 2005

(b)(3), (b)(6)

Background and Timeline

Problem Statement: Identify the risk associated with accelerating off ramp of US Forces.

Background:

- JS Draft PLANORD (1 DEC 05) directs the development of COAs to reduce BCTs in Iraq
- SECDEF COAs: (1) reduce to 13 BCTs in Iraq NLT Mar 06; (2) reduce to 10 BCTs in Iraq NLT Jun 06 and (3) reduce to 8 BCTs in Iraq NLT Sep 06
- Develop other COAs for SECDEF consideration as well
- JS J3 suspense is 13 Dec 05; working with the CCJ3 to determine way forward
- MNC-I refined current planning to address PLANORD requirement

Timeline:

Facts, Assumptions, Constraints and Issues

Facts

1. Modified OIF 05-07 Force Rotation is 15 x BCTs in Iraq + 1 x BCT Call Forward.
2. JS approved OIF 06-08 Force Rotation is 13 x BCTs in Iraq + 1 x BCT for Call Forward and 1 x BCT PTDO.
3. Decision point to redeploy Call Forward Force (2/1 AD) to Europe is March 06.
5. US Forces currently provide 54 x out-of-hide (OOH) Transition Teams; each BCT can provide up to 5 x OOH Transition Teams.
6. Off Ramp BCTs will depart the ITO with their OOH Transition Teams.
7. 95% of the AIF attacks occur in 6 provinces (Ninawa, Al Anbar, Baghdad, Salah ad Din, Diyala, and Al Tamim).

NOTE: "Do not deploy" BCTs identified in each COA can remission to support PTDO rotations.

Constraints

1. Estimate 6 month lead time required IOT source/deploy external Transition Teams.
2. Realignment of BCTs will require some disruption of OOH Transition Teams.
3. BOG extensions require SECDEF approval; invite media attention.
4. Significant requirements for security of PRTs will create delays and/or major modification to each COA.

Assumptions

1. Insurgency will not grow post-December election period; sectarian violence will not destabilize Iraq.
2. AIF attacks will continue in the same battlespace (ERV, TRV, Baghdad to Baqubah, Tal Afar to Mosul, and Bayji to Kirkuk).
3. UK Forces will continue to C2 MND-SE.
4. ROK Forces will continue to C2 MND-NE.
5. US Forces will retain Theater Security Brigade requirements regardless of off ramp COAs.
7. CJCS will support request for additional external Transition Teams.
8. Enablers will not be curtailed at the same rate as US BCTs; enablers required to support and sustain ISF.
9. GOI will not be fully seated until late April 06; assume some loss of momentum in building ministerial capacity to sustain ISF.
10. Iraqi Army will remain on glide path for force generation/assumption of battlespace per the DEC TRA projections.
11. Full Transition Team program required until tactical units achieve Level I; select IA BDEs/BNs begin to achieve Level I NET JUN 06.

Issues

1. Additional external sourced Transition Teams are required after MNC-I off ramps forces to 12 BCTs or less; MNC-I will also require 252 augmentees (Medics and Fire Supporters).
2. Rapid off ramping of BCTs will require MNC-I to relook how they support PRTs, P3s and Transition Teams.
3. BCT BDE HQs plus enablers can adequately partner with an Iraqi Division; less than a BCT partnership per IA Division is problematic.

- COA 3 “Exploitation” 8 + 1 BCTs by SEP 06

COA 1 "Baseline" 10 + 1 BCT Set by OCT 06

Enemy Conditions Set COA 1 "Baseline"

CONDITIONS:

- Shia Dominated Government w/little Sunni Acceptance
- GOI / ISF Capabilities Slow to Improve
- IZR Continue to Attack CF and ISF
- Shia 1.4b Concerns in the South

AO WEST

- Continued presence and firm bases required to deny T&FF ability to regain significant influence
- Patrols in the Western Desert required to reduce T&FF influence over local smuggling organizations
- Ramadi remains under the influence of IZR attempting to gain control over the government and population center - T&FF influence will likely diminish
- Fallujah continues to progress slowly toward self-sufficiency

AO NORTH

- Mosul and Tal Afar remain a Moderate Threat to CF as ISF do not yet possess the capability or public support to reduce T&FF, IZR, and SDM influence
- Attacks continue along MSRs, as IZR-Sunni and SDM maintain influence over the population
- Infrastructure attacks continue in order to influence the political situation as well as provide income to IZR-Sunnis
- In Kirkuk, tension between IZR Sunnis and Kurds increases during TAL 58 negotiations

AO CENTRAL

- Baghdad remains an HVT for T&FF due to its importance and media attention.
- 1.4b surrogates and IZR-Shia continue to strengthen their position in Wassit, Karbala, and Najaf Provinces

AO SOUTH

- Political stability continues as Shia consolidate power; attacks against CF remain low
- In Amarah 1.4b, 1.4d remains at acceptable levels due to Shia dominated government control

~~SECRET//REL to USA, AUS, CAN and GBR//ORCON//20151214~~

COA 1 Initial Conditions

- No change in FF flow across Syrian border.
- No evidence of operational coordination among IZR or SDM.
- Sectarian violence localized; no increase in trends over 90 days.
- Tacit support to T&FF from Syria does not increase.
- 1.4b continues influence by transiting funds and MOIS into Iraq.

Security:

- 11 of 32 (33%) of Iraqi Army (IA) Brigades at Transition Readiness Assessment (TRA) Level 2, assumed battlespace and capable of leading COIN Ops in their sectors.
- 6 of 18 (33%) Iraqi Police at Provincial Level are TRA Level 2 or above, capable of maintaining domestic order.
- Formal agreement for MOD and MOI roles/missions (Joint MOU signed).
- MOD and MOI capable of managing/funding current sustainment contracts.

Governance/Economic:

- Provincial government able to cooperate/coordinate with National Ministries.
- National government able to sustain current essential services.
- No significant increase in unemployment.
- Rule of law institutions show some limited progress.
- MOD and MOI achieves TRA Level 2 (able to develop, coordinate, and implement national policy with coalition support).

“Posturing for the Long War” Potential Courses of Action for the Drawdown of US Forces

(b)(3), (b)(6)

MNC-I C3 Force Generation

14 DEC 05

Background and Timeline

Problem Statement: Identify the risk associated with accelerating off ramp of US Forces.

Background:

- JS draft PLANORD (1 DEC 05) directs the development of COAs to reduce BCTs in Iraq
- SECDEF COAs: (1) reduce to 13 BCTs in Iraq NLT Mar 06; (2) reduce to 10 BCTs in Iraq NLT Jun 06 and (3) reduce to 8 BCTs in Iraq NLT Sep 06
- Develop other COAs for SECDEF consideration as well
- JS J3 suspense is 13 Dec 05; working with the CCJ3 to determine way forward
- MNC-I refined current planning to address PLANORD requirement

Timeline:

Facts, Assumptions, Constraints and Issues

Facts

1. ~~US mid-term elections NOV-06.~~
2. Modified OIF 05-07 Force Rotation is 15 x BCTs in Iraq + 1 x BCT Call Forward.
3. JS approved OIF 06-08 Force Rotation is 14 x BCTs in Iraq + 1 x BCT PTDO.
4. Call Forward Force (2/1 AD) will remain in Kuwait as Theater Reserve until MAR 06.
5. US Force currently provide 92 x out-of-hide (OOH) Transition Teams; each BCT can provide up to 5 x OOH Transition Teams.
6. Off Ramp BCTs will depart the ITO with their OOH Transition Teams.
7. 95% of the AIF attacks occur in 6 provinces (Ninawa, Al Anbar, Baghdad, Salah ad Din, Diyala, and Al Tamim).

NOTE: "Do not deploy" BCTs identified in each COA can be remissioned to support PTDO rotations.

Constraints

1. Estimate 6 month lead time required IOT source/deploy external Transition Teams.
2. Realignment of BCTs will require some disruption of OOH Transition Teams.
3. BOG extensions require SECDEF approval; invite media attention.
4. Significant requirements for security of PRTs will create delays and/or major modification to each COA.

Assumptions

1. Insurgency will not grow post-December election period; sectarian violence will not destabilize Iraq.
2. AIF attacks will continue in the same battlespace (ERV, TRV, Baghdad to Baqubah, Tal Afar to Mosul, and Bayji to Kirkuk).
3. ~~1.4b~~ not provide a Division HQs after JUN 06; will require consolidation of MND-B and MND-CS = MND-Central.
4. UK Forces will continue to C2 MND-SE.
5. ~~1.4b~~ forces will continue to C2 MND-NE.
6. US Forces will retain Theater Security Brigade requirements regardless of off ramp COAs.
7. CJCS will support request for additional external Transition Teams.
8. GOI will not be fully seated until late Spring 06; assume some loss of momentum in building ministerial capacity to sustain ISF.
9. Iraqi Army will remain on glide path for force generation/assumption of battlespace per the DEC TRA projections.
10. Full Transition Team program required until tactical units achieve Level I; select IA BDEs/BNs begin to achieve Level I NET JUN 06.

Issues

1. Additional external sourced Transition Teams are required after MNC-I off ramps forces to 12 BCTs or less; MNC-I will also require 252 augmentees (Medics and Fire Supporters).
2. Rapid off ramping of BCTs will require MNC-I to relook how they support PRTs, P3s and Transition Teams.
3. BCT BDE HQs plus enablers can adequately partner with an Iraqi Division; less than a BCT partnership per IA Division is problematic.

- COA 3 "Exploitation" - 8 + 1 BCTs by SEP 06

Actual

COA 1 "Baseline" 10 + 1 BCT Set by DEC 06

Enemy Conditions Set COA 1 "Baseline"

CONDITIONS:

- Shia Dominated Government w/little Sunni Acceptance
- GOI / ISF Capabilities Slow to Improve
- IZR Continue to Attack CF and ISF
- Shia / 1.4b, 1.4d in the South

AO WEST

- Continued presence and firm bases required to deny T&FF ability to regain significant influence
- Patrols in the Western Desert required to reduce T&FF influence over local smuggling organizations
- Ramadi remains under the influence of IZR attempting to gain control over the government and population center - T&FF influence will likely diminish
- Fallujah continues to progress slowly toward self-sufficiency

AO NORTH

- Mosul and Tal Afar remain a Moderate Threat to CF as ISF do not yet possess the capability or public support to reduce T&FF, IZR, and SDM Influence
- Attacks continue along MSR, as IZR-Sunni and SDM maintain influence over the population
- Infrastructure attacks continue in order to influence the political situation as well as provide income to IZR-Sunnis
- In Kirkuk, tension between IZR Sunnis and Kurds increases during TAL 58 negotiations

AO CENTRAL

- Baghdad remains an HVT for T&FF due to its importance and media attention.
- 1.4b surrogates and IZR-Shia continue to strengthen their position in Wassit, Karbala, and Najaf Provinces

AO SOUTH

- Political stability continues as Shia consolidate power; attacks against CF remain low
- In Amarah, 1.4b, 1.4d remains at acceptable levels due to Shia dominated government control

- No change in FF flow across Syrian border.
- No evidence of operational coordination among IZR or SDM.
- Sectarian violence localized; no increase in trends over 90 days.
- Tacit support to T&FF from Syria does not increase.
- 1.4b, 1.4d by transiting funds and MOIS into Iraq.

Security:

- 12 of 36 (33%) of Iraqi Army (IA) Brigades at Transition Readiness Assessment (TRA) Level 2, assumed battlespace and capable of leading COIN Ops in their sectors.
- 6 of 18 (33%) Iraqi Police at Provincial Level are TRA Level 2 or above, capable of maintaining domestic order.
- Formal agreement for MOD and MOI roles/missions (Joint MOU signed).
- MOD and MOI capable of managing/funding current sustainment contracts.

Governance/Economic:

- Provincial government able to cooperate/coordinate with National Ministries.
- National government able to sustain current essential services.
- No significant increase in unemployment.
- Rule of law institutions show some limited progress.
- MOD and MOI achieves TRA Level 2 (able to develop, coordinate, and implement national policy with coalition support).
