Provinces continue to make efforts to secure deliveries of fuel from BOR.

	ECONOMIC DEVELOPMENT - Fuel, Electricity, Security, Transportation remain at the forefront of public concern across the AOR. - MNDs are in process of verifying location and status on all banks, hospitals, PDS warehouses, and gas stations. Initial estimate of banks is 98 open across ITO, with 28 in Baghdad.
	TRANSITION - Personnel and leadership shortages continue within the ISF. Lack of NCOs and Officers are compounded by DIV and BDE HQs having overages in these areas. - The lack of a structured sustainment capability continues to undermine the ISF's ability to internally support operations. ISF units attempt to create decentralized capabilities to maintain readiness and address shortcomings. Particular problems exist in fuel distribution, maintenance capability, and replacing major end-items.

(U)

(U)

Former Governor Fassal Rakan Nejrus al-Gaoud

Assessment: Expect emboldened Sunni tribal resolve to rid Anbar of AQI; coercion possibly more effective in mixed provinces. Attack will result in reconciliation leaders' heightened personal security measures; future meetings will likely be impeded by emissaries' reluctance to travel
