Synergistic Application of Multiple Lines Of Operations (DOD) [sync]
Create multiple events / crises designed to trigger regime change by ov
DOD and [b(1)(c) 50 USC § 3507]
Create and maintain pressure on Saddam and his supporters
Synergy and speed are greatest threats to regime
  Combination is key NOT individual events / targets
  Saddam is regime’s center of gravity
Sample synergistic events
  Sabotage
  Disarray in inner circle
  Increased external support for opposition
  Loss of income from oil exports
  Loss of sovereignty in western and southern Iraq
Focus of Effort

This pictorially displays how we plan on targeting Saddam and his regime
While 1 and 2 are the most desirable targets they are also the most elusive
Our plan is to attack the WMD wherever we have the opportunity to
Attacking the blue colored targets serves the main
purpose of leveraging groups 8, 9, 10 in order to facilitate regime change quicker
Targeting Decision Process

Big question is:
Based on Guidance, Objectives, Priorities and Effects
- What Must Be hit and When?

Target or Target Set

What can be struck preemptively?

What can planned in Air Tasking Cycle?

What requires Time Sensitive Target / or on order execution?

What are the factors?
