Synergistic Application of Multiple Lines Of Operations (DOD) (b)(3) 50 USC § 3507

Create multiple events / crises designed to trigger regime change by ov

DOD and

(b)(3) 50 USC § 3507

Create and maintain pressure on Saddam and his supporters

Synergy and speed are greatest threats to regime

Combination is key NOT individual events / targets

Saddam is regime's center of gravity

Sample synergistic events

Sabotage

Disarray in inner circle

Increased external support for opposition

Loss of income from oil exports

Loss of sovereignty in western and southern Iraq

Focus of Effort

This pictorially displays how we plan on targeting Saddam and his regime

While 1 and 2 are the most desirable targets they are also the most elusive

Our plan is to attack the WMD wherever we have the opportunity to

Attacking the blue colored targets serves the main

purpose of leveraging groups 8, 9 10 in order to facilitate regime
change quicker
