Definition of Iraqi Local Control

- Iraqi security forces are capable of maintaining a safe and secure environment and maintaining civil order on a day to day basis with limited coalition oversight in selected areas
 - Coalition forces conduct periodic checks of security forces
- Iraqi security forces are capable of acting as the first responders to routine security incidents such as criminal activity or minor civil disturbances
 - Coalition forces provide quick reaction forces to handle major incidents beyond the capability of Iraqi security forces
- Coalition forces positioned in bases outside of urban areas or on their periphery to minimize the disruption of normal commercial and social activity

Transitioning to Iraqi Control

- Our criteria to transition to local controls is both capabilities (IZ Security Forces) and conditions based (Threat in local area)
- Conditions are equally important as capabilities. We could find ourselves in a situation in which we have a minimally capable IZ Security Force, but the FRL is so strong in the area that we can not transition

Fundamental
Equation

If (IZ_{Security} = X) and (Incidents < Y) THEN (DP)

Geographical Areas Overview

- Three Governorates (Dahuk, Irbil, As Sulaymaniyah) are in effect under Iraqi Regional Control
- Area of Operations North, Center South, and South East are substantively under Iraqi Local Control
- Many rural and smaller urban areas in AO's North Center and West are under Iraqi Local Control (no coalition forces in area with periodic patrols)

*if so. What about
the coalition?*

Iraqi Security Forces Overview

- NIA capability is not required for Iraqi Local or Regional Control } *Not So!*
- FPS and BPS are in the TOA process and will be complete by March and June '04 though shortfalls will remain
- ICDC capabilities are projected to meet Iraqi Local Control criteria across the country in the March/April '04 timeframe
- IPS will not meet Iraqi Local Control criteria in most areas of the country until:
 - Equipment – JUL '04
 - Training – OCT '04

Data Collection

- Local Control Assessments from each MSC
- Campaign Plan Measures of Effectiveness includes Local Control Criteria
- C3 Effects collects objective data on New Iraqi Security Forces
