Analysis

Facts

1. Iraqi Army is the pacing item for assuming Iraqi Army Lead (IAL)
2. Iraqi Army Lead to Provincial Iraqi Control is the baseline model for achieving Iraqi Security Self-Reliance (ISSR)
3. In Tactical Overwatch, Coalition forces command and control IA Divisions
4. In Operational Overwatch Iraqi Ground Forces Command (IGFC) commands and controls Iraqi Army Divisions

Constraints

1. Military Transition Teams do not withdraw until unit attains TRA 1
2. Police Transition Teams do not withdraw until unit attains TRA 2
3. Iraqi Security Forces Logistics capabilities continue to lag

Assumptions

1. Multi-National Corps-Iraqi will adjust police transition teams to accommodate off ramps
2. Department of State will fulfill their Provincial Reconstruction Team contributions in a timely manner
3. 5 X MP COs will be sourced
4. The Government of Iraq (GOI) and growing ministerial capacity will enable transitions
5. UNSCR or similar SOFA with GOI sustains Multi-National Force-Iraq freedom of action

Risks & Issues

1. Transition Team killed or captured
2. Iraqi units deteriorate for lack of support
3. Tribal, ethnic, sectarian influences prevent ISF from fully maturing
4. Insurgents shift main effort to provinces that have attained Provincial Iraqi Control
5. Off ramps affect support to transition teams
6. MOU that defines supporting and supported roles for IA, IPS, NP under crisis circumstances
7. Checks and balances on the use of force defined between Provincial Governor, Minister of Interior, Minister of Defense, and Prime Minister
8. Visibility of resource linkage—budget—between federal and provincial governments
