The decisive operation during the past week for Phase II was a battalion-sized air assault into Objective Junday (11 x detainees and 2 x caches) and a B-1B delivered kinetic strike to cut a known enemy line of communication in Objective Kodiak. Targeted raids continue against the Abu Bakr AQI cell Northwest of Iskandariyeh and into the Euphrates River Valley (ERV) and the Sheik Majid JAM cell IVO Isakandariyeh. Local nationals from the Quarghali and Mufarj groups along the ERV angered by terrorist activity drove AQI forces from Jurf as Sakkhar into the Owest area. Intelligence estimates AQI forces number 120 to 150 local and foreign fighters led by... (8)(8)

![Diagram of MND-C/TF 1.43 OPERATIONS]

The cell's defeat is the objective of Marne Avalanche Target Set "W" which began on 20 JUL with the clearance of Owest village and the former FOB Dogwood area via a TAO with MND-West. Most significantly, on 20 JUL/3 BCT in a targeted raid, detained MND-C #1 HVI: (3)(3) a JAM leader responsible for multiple attacks and insurgent activity against C and the populace.

Transitions: The OGC directed that new units come in to replace 2/10 IA from the 160th IA, they will be issued M16s. The IGFC laid down the timeline for the SIBs to return at K1 training center to be retrained so they can return to their home units at regular IA battalions.

Governance: 4-25 ABN along with the council members of the Shabibi government to discuss the budget for the upcoming soccer tournament (320 games) to be held. The council members provided signed letters of approval from the chairman of the Provincial Council of Shabibi and the municipal IGFC granting permission to conduct the tournament. The governor of the Ministry of Sports and Recreation. 4-25 ABN and the IGFC met with the Shabibi City Council to lay out the details of the upcoming Small Business Employment Grant which will last 7 months and train 150-250 personnel. 3-3 BCT attended the weekly Shabibi meeting at the IA DRU, over 100 sheiks were there. The PSC concept was not well received, local sheiks do not want any guns in the hands of the public. 3-10 MTN conducted a VCP in Kheche village, that turned over 200 animals, an area peaceful area that is secured by the IA but lacks any veterinarian assistance. 2-3 BCT identified four areas which can be leveraged for reconciliation efforts: the Hawar Jafiu area, the area surrounding ITE TAMPA and ITE JACKSON, the northern part of Arab Labour and the southern part of Arab Labour. The major challenge will be developing cooperation within a tribal council to the funding between Shabibi and Shabibi Sheiks. 3-3 BCT also met with the South Baghdad Awaiting Council, they will also host engagements to mature the relationship and determine the appropriate level of cooperation.

Economics: 4-25 ABN attended an economic tourism meeting held by the Shabibi PRT. The focus was the Babylon Ruins’ ability to generate a revenue stream, the provincial council will not fund tourism, so private investors are currently being sought. 3-3 BCT discussed the small business grant program with the Shabibi council and finished payment for canal cleaning in the Wadi area. 3-10 MTN met with the Management of National Metals Bicycle Company. Issues are lack of electricity and cheaper imports. The company currently lacks contracts, possible wheelchair contract for the provincial health clinic could boost the companies financial position and legitimate the local government. 2-3 BCT and FRT will identify and assist water pump stations in Arab Labour, along with canal drainage and canalblockage projects and improve the electrical infrastructure over the long term. The projects will enhance essential services in the region and provide employment.

Communications: Our anti-AQI and pro-Gol IS messages seem to be producing the desired effects. Rejection of AQI by many tribes has increased. Many people, tribes, and tribal leaders across the MND-C operational environment have sought coalition forces out in a number of instances and expressed a desire to work cooperatively across sectarian lines and work with, and within, the GoI framework.

Offensive operations continued throughout the MND-C OE as 22 x company-size or higher operations occurred during the past week. These operations continue to destroy AQI and JAM capabilities and dislocate these terrorists from the populace. In the past week local national support and reporting continued to gain momentum—an overt sign of the enhanced security and stability situation in MND-C. In the Marne Torch OE, CF and ISF operations accounted for 6 x EKIA, 19 x detainees (2 of these were BN HVIs), 3 x IEDs were found, and 40 x structures were cleared. Two significant operations the past week in the Marne Torch area of operation included OP Phoenix—a 1-40 CAV and IA Company air assault raid into Arab Jobbar targeting AQI cell leadership. The operation resulted in 7 x detainees (1 x HVI). Also, OP Raptor II cleared the AQI safe haven in Hawr Rajab, a historic launch site for accelerants to violence in Baghdad. This operation included the kinetic destruction of 2 x AQI safehouses with USAF JDAMs and AWT hellfire missiles. In the Marne Avalanche OE there were 8 x EKIA, 20 x detainees (including 1 x BN HVI), 4 x IEDs found, 6 x caches were found, and 33 x structures were cleared. The most significant operation in this AO was 4/25 ABCT’s OP Marne Avalanche, Target Set “W.” In this operation, 3-509th conducted a BN-size attack to clear AQI safe havens in the Euphrates River Valley. This operation found and destroyed an AQI bed-down and training area leading to further defeat of AQI cells South of Baghdad. 3/3 BCT’s Operation Talon X had the most significant HVI capture throughout the MND-C OE in that o—a senior JAM leader and facilitator. MND-C forces continue full spectrum operations supported by Field Artillery assets which delivered 175 x missions across the division area and the USAF supported with 1-4 x JTARS including 7 x kinetic
strides.

Transitions:

* 8th ID Command General D. Dohman has delivered and ordered to 8th IA DIV to receive M16/M4 replacements. The first phase will send four companies to Bessamiah to turn in their Soviet-style weapons for a one-for-one replacement of M16/M4.
* 8th ID also successfully planned and completed repairs to the power lines into Baghdad, the mission was led between 8th ID and the Ministry of Power.

Goverance:

* 4-23 ABN attended the EPRT water conference at Kaisu. The objectives of the conference were to identify various, specific water problems and their solutions throughout the region. The attendees broke into three working groups and discussed current problems. The problems fell into six categories: potable and storage, run-off pollution, public health, herd health, irrigation and drainage. The group discussed the cause and effects along with the connections between the problems. The goal was to develop regional or local plans to resolve the problems. USAFO is planning a meeting with USIs in the area.
* 1-3 RCT attempted to deliver bottled water to civilians of Salman Pak as part of a project. The civilian water truck was stopped at an IOP OP and turned away. They are working with a Salman Pak councilman to guarantee the safe transport of a water-bottle contract to Salman Pak.
* 10 MN met with the Ministry of Health, and the US Institute of Peace (USIP) in the area. The USIP is an independent, nonpartisan, national “think-tank” organization that works to resolve violent conflict.
  * The BCT delivered HA consisting of clothing, shoes, feminine products, and toys to the Qadaa Council Building in Mahmoudia. The HA is intended for all Iraqi widows.
  * The BCT met with Al Gom and Kursi Tribes who agreed to provide 500 workers to protect critical infrastructure and key community centers in the area.
  * On the 26th, the KIP and the Commander of the KIG met with the USIIG and the representatives of the ICP to discuss the development of the MOUs detailing the construction of the power plants and the ICP.

Economics:

* 3-51 BCT is working on the 12 canal job in Al Ainieh, which will provide 300 jobs for two months and 500 jobs that will be sustainable for a period of three months. The canal connects to the canal in Al Ainieh and will pump water to the Al Ainieh canal and the 200,000 ton per day salt plant. The BCT continues to supervise over $5 million dollars of active and pending CEC projects, the Ministry of Agriculture of OAE.
* 3-10 MN is working on the reestablishment of a vocational school in Al Ainieh. The Abu Gharib Center has been closed for five months and the school will employ 35 teachers and 500 students.

Communications:

* Several PSYOP products were shown to a former AQI operative turned informant. The AQI was aware of the messages. According to the informant, the use of wanted-type blacklist products such as DUSTWUN, showing names and images of accused AQI members is far more effective than generalized AIF-type products. He also said that AQI was very aware of the CF PSYOP operations in the area. AQI tells the local nationals that if they are caught with CF products or rewards, that they will be killed. Finally, the informant said the only way to stop AQI would be to bring employment and jobs to the villages, thus undercutting AQI recruiting incentives which target impoverished youths and former Ba’athist IA members.

Overall, these operations accounted for 15 x EKIA, 3 x EWIA, 60 x Detainees, 27 x IEDs found, and 16 x caches found. In direct correlation to these offensive operations and the defeat of the enemy, LN support for CF and ISF operations continues to gain momentum and is a positive sign that security, and thus, stability are returning to the MND-Center AO. In the past week alone, LN tips and direct action have led to the seizure of 8 x caches, the finding and clearance of 10 x IEDs, and the discovery of 5,000 lbs of HME. Concerned Citizens are currently manning 130 x check points as well. To date 7,240 concerned citizens have come forward for legitimacy.

Both attack averages and effective enemy attack averages are down from the historic daily averages.

In Diwaniyah, CJOTF forces received a spot report that 15 JAM members were transporting Katusha rockets in preparation for an attack on FOB Echo. CJOTF requested two F-16s who arrived on station and observed a group of personnel preparing to fire the rockets from the same location that intelligence had previously indicated and dropped two 500lb bombs resulting in 3 K EKIA. CJOTF assesses that the cumulative effect of the last five days of USSF/POLSOF/8th IA operations around Diwaniyah has resulted in sustained pressure on the JAM network and further strained their leadership, facilitators and infrastructure. ...Slide please.

06 AUG 07
Good morning, sir, this is your update covering the security plan for the Observance of the Death of the 7th Imam.

The commemoration of the death of Imam Musa Al-Kazim, the 7th Imam, is observed on 25 Rajab, this year it will fall on 9 August. Expectations are for as many as 1 million Shi‘ites to make the pilgrimage from their homes to the Kadimiyah shrine, located in northern Baghdad.

In 2006 and 2004 the Kadimiyah shrine was the setting for rocket attacks and suicide bombers. During the 2005 observance of 7th Imam rumors of impending SVVEST attacks caused a human stampede that ultimately led to the deaths of 965 people.

Although no specific threats have been reported against the shrine or the event, intelligence assesses that AQI and sectarian extremists will likely attempt to target the large crowds of Shi‘ites and the Kadimiya shrine. With such a significant media event there are increased opportunities for AQI/extremist publicity and therefore potential for attacks including spectacular attacks in order to further their strategic aims. Attack(s) by AQI are very probable based not only on the previous history of attacks during this event but also given the nature of and stage of insurgency/terrorist campaign.

AQI hopes to evoke a JAM response which to date has been lacking, in order to continue to foment sectarian violence. This threat is amplified by the significance of the event, the proximity of the MNF-1 CG report to US Congress and the Gol political situation. As a result the Most Likely Enemy COA is SAF and IDF attacks against routes and convergence points; VBIED attack(s) outside main security cordon, on bridges or choke points; ISF/CF and/or Gol bases and infrastructure.

The Most Dangerous Enemy COA is an SVEst attack within the shrine compound and/or large crowds or choke points in order to achieve mass casualties through explosion and panic similar to the 2005 event.

In addition, should the MD COA occur, expect multiple SVBIEED attacks on route / shrine / choke points.

Slide, please.
The PM designated the BOC as the headquarters responsible for coordinating security for the 7th Imam Observance. LTG Abiz has instructed his forces that ISF are fully in the lead for this operation and coalition will remain prepared to support. The BOC will coordinate security operations at the Kadamiyah Shrine through the Karkh Area Command and the GOI will coordinate interministerial activities, including emergency and humanitarian response, at the NOC.

Security of the shrine includes an inner ring of 9 checkpoints manned by MOI forces of the Shrine Security BN, comprised mostly of FPS (depicted in green). An outer ring of 11 checkpoints manned by the NP Justice Battalion extends as a second ring (depicted in yellow). Finally, a third ring of 20 checkpoints manned by the 5/1/6 IA BN (depicted in orange) completes the fixed site security plan for the area. In addition to checkpoints, a no vehicle curfew will be enacted in the Kadamiyah District from 0600 Wednesday, 8 Aug to 2200 Friday, 10 Aug. A Baghdad-wide no vehicle curfew will be in effect from 0600 on Thursday, 9 Aug to 2200 on Friday. The question on whether fuel tankers will be allowed into the city during the vehicle ban remains unresolved.

ISF will also control traffic along the routes and bridge crossing sites in Baghdad. Pilgrims will approach the shrine from three major routes, from the north, west, and south as depicted with the red arrows. The primary bridge crossings are depicted with yellow circles and include the 17 July and Sinak Bridges, both are assessed as structurally sound and capable of handling large crowds. The blue circles indicate alternate bridge crossing sites that will only be made available if necessary.

Coalition forces will fully support ISF during this operation. Support will be largely transparent except when needed or emergency support is required. MND-B, on order, will establish Vigilant Guard variation “D” during the event IOT provide continuous ISR and ground observation of historic POO sites. 2/82, 2/1, 2/2, and 4/1 BCTs will provide an Air Weapons Team and a PLT size ground QRF as enabler support during the operation. Teams will be maintained at REDCON 2 during the event. MEDEVAC and MASCAL support will also be ready and available in case of an emergency situation. Additionally, 2/2ID O/O provides EOD Teams IOT clear bridges and routes IOT provide Pilgrims freedom of movement.

Slide please.

(Backup: Based on the current security measures and significant barrier material around the Shrine, MND-B assesses that a VBIED detonating at the closest possible point to the shrine would cause less than 1% structural damage to the shrine.)

MND-BAGHDAD AVERAGED 32 ATTACKS PER DAY OVER THE LAST WEEK. THIS IS A DECREASE FROM THE PREVIOUS WEEK (45). VBIED ACTIVITY DECREASED FROM 7 TO 5 ATTACKS.

IEDS AND SMALL ARMS FIRE ACCOUNTED FOR 69% OF ALL ATTACKS.

MURDER VICTIMS DECREASED FROM 35 VICTIMS TO 26 VICTIMS AND WERE CONCENTRATED IN EAST RASHID AND ADHAMIYAH.

SECURITY – FOREIGN INTERNAL DEFENSE – IN ADHAMIYAH, 1/11 IA WITH 3-7 CAV ASSISTANCE CONDUCTED A SERIES OF OPERATIONS IN & AROUND THE ABU HANIFA MOSQUE WHICH RESULTED IN 57 X DETAINES, 4 X CACHES AND 1 X VBIED (F).

SECURITY – COUNTER-INSURGENCY OPERATIONS – IN EAST AND WEST RASHID, 4-1 ID CONTINUED OPERATION DRAGON HAMMER IN MASAAFE AND COMMENCED OPERATION DRAGON ANVIL IN HADAR. TOTAL BDA FOR ALL OF MND-B INCLUDED 83 X DETAINES (23 X DETAINES ARE RELATED TO THE SOUTH KARKH VBIED NETWORK) AND 7 X CACHES SEIZED. NEXT WEEK IN MND-B, 4-1 ID WILL CONTINUE OPERATIONS DRAGON HAMMER AND DRAGON ANVIL IN EAST RASHID.

SECURITY – COUNTER-EXTRA JUDICIAL KILLING – THIS WEEK, MND-B CONDUCTED 3 X C-CEJK OPERATIONS, DETAINING 6 X IA.

ECONOMICS (INFRASTRUCTURE AND BASIC SERVICES) – IN SADR CITY, THE GOVERNMENT FINALLY PROVIDED SOME FUNDING TO HELP THE INSTALLATION OF A 33KV AND A 132KV POWER STATION. THESE STATIONS PROVIDE 1-2 HRS OF POWER DAILY TO THE LOCAL POPULATION. THE CITIZENS ALSO BELIEVE THE GOVERNMENT HAS TRULY INCREASED THE PEOPLE INCLUDING DOCTORS, NURSES, MEDICINES AND HOSPITAL BED AVAILABILITY.

COMMUNICATIONS – THERE ARE NO NEWSPAPERS BEING DISTRIBUTED IN THE AREAS OUTSIDE OF BAGHDAD OTHER THAN THE BAGHDAD NEW. LOCAL RESIDENTS OUTSIDE OF BAGHDAD REPORT MORE MURDER. THE INTERVIEW FOR BASE STATIONS MOST LIKELY ARE THE LONGDISTANCE VICE OF THE AMERICAN MILITARY LOCAL RESIDENTS PROVIDE ALL THE LOCAL MESSAGES.

During the past week TF 1.4a forces executed 50 x company or higher operations to disrupt and defeat extremist force in AO Marne. This is an offensive surge of 15 more missions than the previous week.

The MND-C Main Effort—OPN Marne Avalanche and the Supporting Operation—OPN Marne Torch accounted for a combined total of 80 x detainees, 14 x IEDs found, 3 x caches seized, and 99 x structures cleared during the past week.

OPN Eagle Passage III, a combined OPN with CF and IA provided area security for the Shia faithful observing the pilgrimage to Baghdad for the 7th Imam observance.

Along with this the National Police manned 20 x checkpoints and cleared all vehicles into Baghdad. This successful operation prevented sectarian violence and indicated a new level of ISF competency and security. Most importantly from 04-11 AUG, MND-C killed DIV HVI Ahmed Taha Awad Al-Janabi a Senior Emir of the Yusifiyah region; and captured DIV HVI (b6), a JAM Commander in Mahmudiya and (b6), a JAM Commander in Narhwan. These extremist leaders removal from the battlefield will disrupt enemy operations.

To date OPN Marne Avalanche has resulted in 16 x EKIA, 98 x detainees (8 are HVIs), 50 x IEDs found, 22 x caches found, and 119 x structures cleared. Both attack averages and effective enemy attack averages continue a downward trend from the historic daily averages. A significant aspect of this positive momentum is the ongoing support of the local populace. As security improves and stability returns to Babil, local nationals continue to organize their tribes and communities into concerned...
citizens groups. In the past week significant progress has been made in engaging the Shia populace of Iskandariyah and Djbella.

Transition:
- The 8th MIA established security for the pilgrims arriving to commemorate the 7th Imam’s death. The next set of companies to receive MIA/NGOs are scheduled to move to Iskandariyah for the filming on the 12th of Aug.

Governance:
- On the 20th of Aug, 2-10 MNf met with members of the US IP and escorted the MNO Qada Mayor to the Baghdad International Airport to facilitate his movement to the Sheikh reconciliation conference in Jordan.

Economics:
- Seddah Hydroelectric Dam, a USACE project that will repair the three damaged turbines. Currently, the dam only has one turbine that is functioning. DG of electricity needs to agree with USACE that MDO will be responsible for the maintenance of the dam once it is repaired. Contract was recently approved and is being funded.

MND-BAGHDAD AVERAGED 41 ATTACKS PER DAY OVER THE LAST WEEK. THIS IS A INCREASE FROM THE PREVIOUS WEEK (32). VBIED ACTIVITY INCREASED FROM 5 TO 6 ATTACKS. THE EXTENDED POWER ENABLES ALL THE SERVICES AND SHOPS TO REMAIN OPEN LONGER. THE EXTENDED HOURS OF POWER ALLOWS SHOPPERS TO SPEND EXTRA MONEY ON OTHER GOODS AND SERVICES.

COMMUNICATIONS — THE BAGHDAD NOW IS THE ONLY NEWSPAPER THAT IS DISTRIBUTED TO THE
AREAS OUTSIDE OF BAGHDAD. THE POPULATION WAS VERY HAPPY WITH THE SECURITY EFFORT LAST WEEK FOR THE 7TH IMAM OBSERVANCE. PEOPLE HOPE THIS WILL BECOME THE NORM FOR BAGHDAD. THE POPULACE IS VERY DISCOURAGED BY CONTINUED JAM AND AQI INTIMIDATION.
Security:

- During the past week TF [1.4a] began the decisive phase of OPN Marne Husky, an operation designed to disrupt AQI and JAI in vicinity of the Samrah Jungle and Al-Lej and JAM in vicinity of As Suwayrah. Past week TF [1.4a] began OPN Marne Husky. These areas are considered sanctuaries and serve as transition points for accelerants that fuel sectarian violence into and around Baghdad. 3 CAB is the main effort and they have a company of Infantry that will conduct targeted Air Assault raids about every four days. CJSTF is also conducted targeted operations in the objective areas. To date Marne Husky has conducted 3 x manned/unmanned teaming operations, 18 x kinetic strikes, and has detained 62 x personnel.

- Also during the past week OPN Marne Avalanche was completed as a Division-level operation. 4/25 will continue the disruption of enemy forces with their ongoing Spartan Avalanche. At the conclusion of Marne Avalanche on 15 AUG the final BDA effects were 17 x EKIA, 156 x detainees, 70 x IEDs found, 26 x caches found, and 169 x structures cleared. Marne Avalanche captured 1 x AQI DIV HVI and 2 x JAM DIV HIVs and killed 1 x AQI DIV HVI. Overall, Marne Avalanche did achieve its desired endstate—extremist operations have been disrupted, key terrain has been retained, and ISF presence is being increased.

- The past week also included 8 x Company or higher Air Assaults and more than 30 x company or higher named combat operations. Across the AO, attack trends remain below the historic averages, concerned citizens continue to come forward, ISF capacity is building, and local tribal engagements continue....all indicators of
continued improvements in the security of TF [1.4a] operational environment.

• On 13AUG07, 2/10 MTN and 4/6 IA conducted Operation EAGLE DIVE 3, a combined air assault raid west of Latifiyah resulting in 9 x detainees and 3 x local nationals rescued. The 3 rescued LN claim AQI took them hostage because they were US informants from Quargouli Village.

• On 16AUG07, 3/3 HBCT conducted Operation ABLE ASSASSIN 3, a raid northwest of Nahrawan resulting in 1 x EKIA and 8 x detainees.

Governance:

• D/1-15 IN in AO Blackhawk of 3-3 BCT, continues to train the concerned citizens as part of Operation Minutemen. The Concerned Citizens of Al Arifiya have their uniforms and all have been placed into the BATS system.

• A delegation of eight prominent citizens from Mahmoudiya District South of Baghdad met with senior Sunni tribal leaders based in [1.4b]. The purpose of their mission was:
  • To acquaint the sheiks with recent positive developments in the district’s overall security situation.
  • To encourage their participation in a reconciliation process, beginning with a conference of key local tribal and government leaders.
  • To win their support for a Mahmoudiya Tribal Council to resolve disputes, nominate recruits for the Iraqi police and army, identify terrorists and monitor the progress and conduct of the security forces.
  • To obtain support for the creation of three new army battalions composed of recruits provided and vetted by the tribes and facilitated by five new recruitment centers.

• In 3-3 BCT AO the Sheiks of the southern Bowl want to rid the area of AQIZ and state the CF operations have been effective causing the extremists to move west. A meeting has been set for 18AUG07 with the first group of concerned citizens for the area.

• Over the last week 100k bottles of water and 190 bags of food have been distributed as humanitarian aid.

Economics:

• EFR met with the Deputy Chairman of Watan businessmen’s Union to learn about his civil society organization and determine opportunities to work together in order to support private sector development in the province. The businessmen’s Union currently represents construction, mechanical, and electrical companies, but it is looking to expand; the union possesses the foundation for a solid commercial advocacy forum.

• The Marine Economic Development team visited the auto repair facility in 3-3 BCT’s AO. The facility is used for the storage of autos and auto parts and the repair of trucks. Prior to 2003, the site was an assembly plant for Mitsubishi, Deutzan and Volvo. The site currently employs 100 locals for 8 hour shifts repairing trucks. The facility is operating at full capacity.

• The Marine Economic Development team visited a Dairy Farm in Al Watada. The farm could be up and running within one month if it had steady electricity, water and security according to the management. Prior to 2003, at max production it had 2000 cows producing 12000 liters of milk, 4 tons of cheese and other dairy products per day.

Observations:

Last Week Observations:
In the last update, there have been numerous reports indicating an increase in the number of insurgent activity, especially in the north of the province. This is a response to the increased level of security measures and operations in the area. The Iraqi government is working to improve its ability to protect the population and infrastructure.

A recent operation near the town of Samarra has resulted in the capture of several high-value targets, including a senior insurgent leader. The operation was coordinated with coalition forces and involved a significant deployment of resources.

The current situation remains tense, with ongoing operations in the north and west of the province. The ORincludes a map showing the area of operations and key locations.

The current operations include a raid on a suspected insurgent hideout in the village of Al-Malikiya. The raid resulted in the arrest of several suspects and the confiscation of weapons and explosives.

The map includes a legend indicating the areas of special interest and the locations of key facilities. The map also highlights the routes taken by the forces during the operation.

The OR also includes a table summarizing the results of the raid, including the number of suspects arrested and the amount of weapons seized.

Overall, the situation remains challenging, but the coalition forces are making progress in securing the region and disrupting the activities of insurgent groups.
