*Exploiting Early Success  
(Exploitation Sequel Mission Analysis)*

~~SECRET/NOFORN~~

1

Approved for Release

## *Assumptions*

~~SECRET/NOFORN~~

- G-Day = Execution Day
- Initially insufficient troop to task for Military Administration
  - CFC will establish Martial Law (Geneva Convention Art.5)
- Regime leadership at large
- Clashes along ethnic fault lines
- Defeat of RGFC = military collapse
- CFC will be allowed to use public officials

~~SECRET/NOFORN~~

3

Approved for Release

1. Removing the Regime evolves over time
  1. Current regime loses control
  2. CFC gains full control
  3. CFC transitions control
2. As the regime loses control, an environment is created where several entities attempt to gain control:
  1. Regime attempts to regain control
  2. CFC conducts operations to establish control
  3. Internal dynamics (ethnic, religious, tribal)
  4. Regional/International dynamics
3. Each phase generates new challenges requiring solutions that are not strictly military in nature to set conditions for transition.

## Indicators of Collapse

~~SECRET/NOFORN~~

- ♦ SOC/OGA Liaison reports
- ♦ Failing police infrastructure: increase in riots and violent acts along ethnic fault lines
  - ✓ Increase in refugee flow out of large population centers
- ♦ Local/regional government leaders (Baath Party) leaving towns
  - ✓ Tribal Leaders taking charge (controlling media)
- ♦ Mass capitulation of RA and/or RGFC units
  - ✓ Desertion of Sunni officers commanding Shia units
- ♦ Oil fires, destruction of infrastructure

**Need to separate indicators of collapse from Iraqi COAs  
(i.e. scorched earth policy is not synonymous with regime collapse)**

*Executing Exploitation*

~~SECRET/NOFORN~~12

Approved for Release

## Exploitation Tasks

~~SECRET/NOFORN~~

- Hussein and inner circle K/C/F (Regime Overthrow)
- WMD Controlled/SSE Operations
- Territorial Integrity Intact
- Provisional government in place
- Increase security in rear areas/LOCs
- Respond to Chem/Bio hazard: Quarantine/Mortuary Affairs
- Security of Military Weapons
- Provide CMO/HA (electricity, water) > integrate NGOs/IOs (ICRC)
- Secure Baghdad and key population centers
- Establish Transportation Infrastructure (trucks, railroads, APODs/SPODs, LOCs)
- Change ATO (don't bomb surrendering units)
- Modify ISR plan: SCUD hunt continues, PIFWCs, Kurds, Turkoman, Terrorist organizations, etc.
- Separation of war criminals from population
- Secure oil, medical, warehouses facilities (oil fires solution)
- IO Plan: Leaflet drop, secure a medium to keep population informed
- Kurd/IZ divisions surrender/disarm
- Process prisoners of the regime (separate political activists from criminals, Iranian and other POWs)
- Establish Emergency Response Services
- Employment for population

Approved for Release

#### COMPOSITION

- IN Battalion TF
- FSB TF
  - Medical Element
  - Supply Element
- AV Company
- MP Company
- Transportation Co.
- EN Platoon: (mines/mobility)
- NBC Recon/Decon Det.
- CMO Det.
- PSYOP Det.
- Public Affairs Det.
- MI Det. (SSE)
- JAG Det.

#### KEY TERRAIN (Objectives)

- Oil nodes\*
- Shrines
- Hospitals\*
- Electrical grids\*
- Water/sewage
- Warehouses
- Road/Railroads
- Media Outlets\*
- Police facilities
- AHAs/Arms storage

## Summary

~~SECRET/NOFORN~~

- Operations to control Baghdad address issues associated with the "Units in Contact" tasks. Keep forces in contact focused on warfighting tasks.
- There is requirement to develop a scheme of maneuver for the battlespace between the Joint Rear Area and operations in and around Baghdad addressing the "Follow on Forces" tasks.
- Closing the gap between the regime losing control and the CFC gaining Full Control minimizes the strategic exposure.

~~SECRET/NOFORN~~

19

Approved for Release

## *The Way Ahead*

~~SECRET/NOFORN~~

- Determine conditions for executing exploitation
- Develop CONOPs for gaining full control
- Coordinate reconstruction efforts with JCS, OGAs and coalition partners
